Reduce IT support costs by optimizing business PCs

Once computers stop working at peak performance, your entire business slows down. Inefficient PCs which slows down, crash, or run out of hard drive space decrease employee productivity and slows down IT resources.

CCleaner Business Edition’s patented technology optimizes computers to ensure your business runs efficiently — without you doing a thing. It cleans unnecessary files, recovers hard drive space, reduces crashes, and speeds up computers automatically, whilst protecting privacy and security. CCleaner Business Edition cleans multiple user profiles, updates automatically, supports scripting, and comes with priority technical support. If you’re looking for a cost-effective solution to maintain desktops, servers, and virtual computers, look no further than CCleaner Business Edition.

CCleaner Business Edition highlights

1. CCleaner Business Edition analyzes PCs to see what can be cleaned. Your IT team has control over what gets cleaned at all times.

2. The patented Registry cleaner locates and fixes problems in the Registry to maintain stability.

3. CCleaner Business Edition removes tracking cookies, while keeping the cookies your employees need, so they can access web-based or intranet based applications.

Cleaner Business Edition — Higher Efficiency, lower costs for it

- **Optimize computers**
  CCleaner’s patented cleaner speeds up endpoints and cleans out unnecessary files that take up valuable hard drive space. It also clears old Registry entries that can lead to instability.

- **Reduce IT support costs**
  Optimized PCs means less need for in-house or outsourced support. CCleaner Business Edition frees up IT resources to handle other tasks.

- **Maintain security**
  Advertisers and websites track your employees online with ‘cookies’ that stay on their PCs. CCleaner erases these cookies so company data stays confidential.

- **Protect your company’s privacy**
  CCleaner can clear browser history, passwords, and other information. Employees can also use it to securely erase sensitive files to prevent data theft and other concerns.

- **Increase productivity**
  CCleaner stops Windows from running unnecessary background programs during startup that slow computers down. The result is faster boot time and increased productivity.

- **Increase ROI on existing hardware**
  By using CCleaner Business Edition, on your existing PCs, you can be sure to maximize your investment in existing infrastructure.

Features

CCleaner Business Edition is the cost-effective way to keep computers running like new, to prevent business interruptions and ensure employees can get to work quickly. CCleaner Business Edition can clean PCs in under a minute, so there’s no downtime.

1 Automated cleaning
   Gain total control by scripting CCleaner so it runs across computers without you doing a thing.

2 One-click cleaning
   Basic usage of CCleaner Business Edition only requires one mouse click. It’s so straightforward that any employee can use and it’s completely safe.

3 Supports all computers
   CCleaner Business Edition is designed to work on all Windows-based endpoints in the organization. It supports physical PCs, virtual computers, servers, and terminal services.

4 Cleans multiple user profiles
   CCleaner Business Edition can clean all user accounts on a multi-user computer at once.

5 Full customization
   CCleaner Business Edition enables precise control of what is cleaned and what is kept on a PC. Advanced users or IT workers can also automate it using simple scripting. It can run on a schedule, clean custom applications, and more. No complicated programming language or knowledge is needed — scripting uses standard Windows text files.

6 Priority technical support
   CCleaner Business Edition comes with priority technical support by email, and our support representatives are trained in supporting small or medium-sized businesses just like yours. They will resolve any issues in a quick and friendly manner.
